

Environmental and Watershed Management

KGS Group obtains approvals / permits for our clients with water-related projects such as bridge and culvert crossings, land developments, flood control, hydroelectric dams, and erosion protection. Our role has ranged from impact analyses and engineering liason, and from input to Environmental Impact Statements to approvals / licenses with environmental agencies and the Department of Fisheries and Oceans.

Environmental services include licensing and DFO approvals, fisheries and water quality assessments, water management plans, phase I & II EA's, contamination remediation, field instrumentation, environmental risk assessments, and soil, water and air testing.
