

ARNPRIOR AND CALABOGIE GENERATING STATIONS PLANT CONDITION ASSESSMENTS

Ontario Power Generation

Renfrew, Ontario

Project Description

KGS Group is currently working with Ontario Power Generation to perform Plant Condition Assessments of the Arnprior and Calabogie Generating Stations near Renfrew Ontario. KGS Group responsibilities includes overall project coordination, as well as condition assessment of the geotechnical, civil structural, and mechanical components of the stations. The primary objectives of the project are to evaluate the current conditions of the structures in conformance with dam safety guidelines, and identify potential areas of concern, maintenance work necessary in the short and longer terms, and possible requirements for monitoring. The work is progressing through the fall 2004.
